

a plane-5 m (5×5)

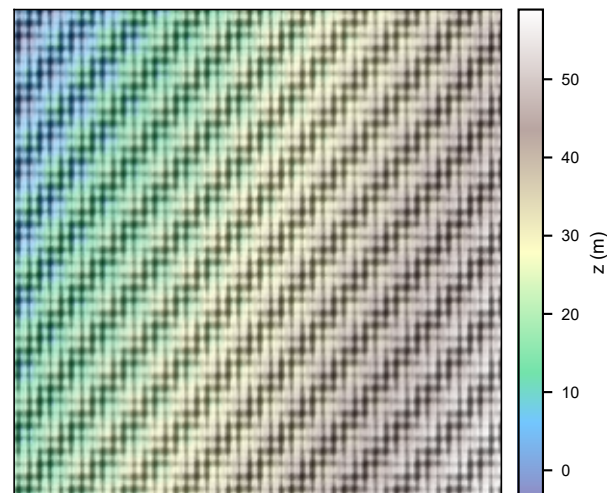

$n_{\text{pit}} = 0$, $n_{\text{out}} = 3$, longest = 3

b terrain-A (256^2 , synthetic)

$n_{\text{pit}} = 53$, $n_{\text{out}} = 98$, longest = 351 $z = 0-20 \backslash \text{m}$

c SRTM-scale stand-in (3601^2)

$n_{\text{pit}} = 2,519,307$, $n_{\text{out}} = 6.03 \times 10^6$ $z = 1033-1457 \backslash \text{m}$

d lidar-down stand-in (256^2)

$n_{\text{pit}} = 1,782$, $n_{\text{out}} = 20,137$, longest = 13 $z = -3-59 \backslash \text{m}$

Elevation colour is per panel (blue/green: lower; yellow/white: higher). Panel c is a display-only block-mean of the deposited 3601^2 raster. c, d are synthetic stand-ins.
